A The same retained candidate can have different evidential status
Initially eligible
A and B
Evidence excludes B
Eligible: A
Not excluded: A
Algorithm removes B
Evidence has not excluded B
Eligible: A
Not excluded: A, B
Operational FI for B
B One possible feedback pathway - not a necessary cause of FI
Current candidate state
Next research opportunities
Updated candidate state
Local amplification does not guarantee candidate withdrawal
C AEA: state audit → event history → optional consequence test
Define audit set
and eligibility function
Compare eligibility with
contemporaneous evidence
Report rule reliability
If history is available:
verify the exit event
No automatic claim of
error or unique truth
Insufficient information:
NOT_DETERMINABLE
If fits and scores exist:
fixed-data eligibility test
